SUMMARY

Product Manager who builds AI, fintech, and growth products end-to-end—from discovery to launch—across regulated financial services, edtech, e-commerce, and direct-to-consumer platforms, driving conversion, compliance, and delivery predictability. Fluent in product discovery, user research, JTBD, prioritisation, experimentation, A/B testing, requirements engineering, APIs, and SQL-driven decisions.

EXPERIENCE

Product Manager — Zamplitude

Mar 2026 – Present

Remote, Dubai

- Ran discovery with four client-side compliance stakeholders across twelve requirement sessions to trace where KYC review stalled, defined the end-to-end review and approval workflow for a regulated GCC investment platform, and shipped it via PRDs, user stories, and UAT—lifting first-pass approval to 91%.
- Designed and shipped a compliance dashboard with a two-level approval flow spanning KYC and EDD question creation, review, and sign-off, plus EDD assignment to flagged users with integrated notifications—replacing an email-based approval trail and cutting question change cycle time from 5 days to same-day.
- Replaced manual case-by-case approval with automated risk scoring built on Nafath-verified identity attributes, defining scoring bands and auto-approval thresholds with the client Compliance Officer—auto-clearing 68% of applications and cutting review turnaround from 72 hours to under 8.
- Audited 30+ compliance actions against regulatory obligations to expose shared-login risk, prioritised a Roles and Permissions module over competing scope, and shipped it with acceptance criteria and QA sign-off—eliminating shared-access accounts entirely and reducing audit-preparation effort 60%.
- Parsed a full AML screening vendor specification programmatically to derive field mappings and status enumerations, flagged two vendor contradictions before build, and shipped a mock service specification with API contracts—unblocking frontend and QA three weeks ahead of vendor sandbox access and averting an estimated 120 hours of rework.

Associate Product Manager — Newton School

Mar 2025 – Mar 2026

Bengaluru, India

- Traced referral-to-signup drop-off through funnel and cohort analysis, prioritised an incentive redesign over competing bets, and shipped it via roadmap ownership and A/B experiments—lifting conversion 32%.
- Owned acquisition-funnel optimisation, prioritising landing-page experiments by impact/effort and shipping iterative variants backed by self-serve dashboards (DAU/MAU, activation)—raising sign-up conversion 91%.
- Found manual proctoring could not scale across 15,000+ exam sessions, scoped an AI-monitoring solution through discovery and PRDs, and led it cross-functionally to launch—cutting proctoring effort 70%.
- Diagnosed reconciliation bottlenecks in manual payments, automated them via a Razorpay API integration, and shipped the workflow with API specs and QA—reaching 100% real-time accuracy and cutting manual effort 99%.
- Identified enrollment bottlenecks behind stalled waitlists, designed an automated seat-allocation workflow, and shipped it via user stories, UAT, and release—converting 30% of waitlisted users with zero vacant seats.

Product Management Trainee — HealthKart

Aug 2024 – Mar 2025

Gurugram, India

- Spotted an unmet category opportunity from merchant and cross-team needs, defined and prioritised the platform capability to serve it, and shipped it—unlocking a new category worth 5% of total revenue.
- Mapped internal user journeys to surface workflow gaps, prioritised a platform migration, and shipped PRDs and user stories that streamlined operations and unlocked SOC-2 compliance.

Category Management Intern — Healthmug

Apr 2023 – Jul 2023

New Delhi, India

- Analysed purchase behaviour to find repeat-purchase drivers, prioritised merchandising and retention changes, and shipped them—increasing repeat purchases 25%.
- Identified demand gaps from category data, prioritised catalogue expansion, and shipped an 18% larger assortment—driving 35% month-over-month growth.

PROJECTS

Signal | AI Product Feedback Intelligence Platform View on GitHub | Live Demo

2026

- Built Signal to turn hundreds of scattered user-feedback items into a trustworthy roadmap—an AI platform that classifies, clusters, and scores feedback into prioritised, evidence-backed recommendations on what to build next.
- Engineered for trust and adoption: explainable scoring, a human-in-the-loop review step, and an evaluation framework measuring theme recall, precision, and hallucination rate, so PMs can act on recommendations with confidence.

SKILLS

Product Management: Product Strategy, Product Vision, Product-Market Fit, Product Discovery, JTBD, User Research, User Interviews, Customer Segmentation, Customer Insights, Roadmapping, Lifecycle Management, 0-to-1 Products, Go-to-Market, PRDs, User Stories, Acceptance Criteria, Requirements Engineering, Prioritisation (RICE/MoSCoW), North Star Metrics, OKRs/KPIs, Journey Mapping, Competitive Analysis, Stakeholder Management, Agile/Scrum, Release Management

Delivery & Programme: Delivery Management, Sprint Planning, Backlog Grooming, Earned Value Management, RAID Management, Change Control, Risk Management, UAT, Retrospectives, Client Communication, Solution Blueprinting, Pre-Sales, Vendor Evaluation, Vendor Integration

Growth & Analytics: A/B Testing, Experimentation, Experiment Design, Funnel & Cohort Analysis, Activation, Retention, Feature Adoption, Growth Loops, Referral Growth, SQL, Product Analytics, DAU/MAU, Growth Metrics, Dashboarding, Data Visualisation

AI & Automation: AI Agents, Agentic AI, Generative AI, LLMs, RAG, Prompt Engineering, LLM Evaluation, Human-in-the-Loop Design, AI Product Development, AI-Native Product Development, Workflow Automation

Domains: Regulated Fintech, KYC/AML, Compliance Workflows, Roles & Permissions, Payments, Proptech, Edtech, E-commerce, D2C, B2B SaaS

Technical & Tools: Python, REST APIs, API Documentation, Payment Gateway Integration, JIRA, Confluence, ClickUp, Notion, Google Analytics (GA4), Mixpanel, CleverTap, Firebase, Tableau, Power BI, Metabase, Advanced Excel, SAP

EDUCATION

MDI Murshidabad <i>PGDM — Marketing & Supply Chain Management</i>	2022 – 2024
KIIT University <i>B.Tech — Electronics & Telecommunication Engineering</i>	2014 – 2018
