## Outcome Mapping

Business Outcome: Revenue

Product Outcome: Session duration/MAU

Impact of solving this problem will be increase in annual revenue by ₹10,00,59,852

## Target Segments

### Urban Professionals (25-34 years old)

- Residing in major tier-1 cities.
- Working professionals, with high disposable income.
- Values convenience.

Potential for Increased Usage: HIGH.

### Urban Youth (18-24 years old)

- Residing in major tier-1 cities.
- Students or recent graduates with low disposable income.
- Values adventure and social status.

Potential for Increased Usage: Moderate.

### Small-Town Youth(18-24).

- Residing in major tier-2 cities.
- Students with low disposable income.
- Values money over convenience.

Potential for Increased Usage: HIGH.

## Why urban professionals?

- Likely to see greater value in premium features that enhance their experience, potentially leading to higher conversion rates.
- A positive, efficient dating experience within their busy lives will have a good retaining potential for this segment.

## Why solve this problem now?

- **Fast growth:** In 2023, Indians will spend almost \$400 million on dating apps, up from \$270 million just four years ago.
- **Competitive Advantage:** By tackling this problem effectively, Bumble can differentiate itself from competitors.

## Impact of solving this problem

### Bumble users in the aged 25-34 years

As 35.64% of dating app users are in this age group. Bumble's MAU: 7.01 Million

=35.64% X MAU  
= 35.64% of 70,10,000 user  
=24,98,363 users

### Urban Professionals

As 30% of dating app users are from tier-1 cities.

=30% of 24,98,363 users  
=749509 Users

### Increase in avg. In-app purchase per user

If the session duration per user increases by 5 minutes

#In-app purchase/min X 5 min=(1/40)X5

Assuming the user uses the paid feature once every 40 min  
=0.125

### Increase in total In-app purchases

=MAU X usage/user  
=(749509) X (0.125)  
=93689

If Avg. paid feature price=₹89

Increase in revenue  
=93689 X ₹89

=₹83,38,321

### Increase in Annual Revenue

=₹10,00,59,852

# ★ Why is there a significant communication gap between users?

## Secondary Research

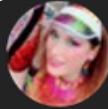

**DawsinsBreek** · 4y ago

Because you're done before the date starts if you plan something bad. You plan a lunch/dinner date, it's too basic. You plan for a movie, it's boring and you can't talk. You plan an activity and it turns out she doesn't like that activity. You just can't win.

**Notasupervillan** · 4y ago

The pressure is always on us. We're supposed to come up with this great date knowing we'll be judged for what we come up with. Dinner and a movie, too typical. Drinks at a bar, sleazy. Coffee, what are you afraid to spend a little? It's a lot of pressure and we don't get any input from the person we're trying to impress.

Related

**Women, what do you think is the problem with most men today in the dating scene?**

The same problem with women. Its a people problem. Dishonest, indirect communication. No one just says what they want. Everyone is too scared that the truth will scare them off.

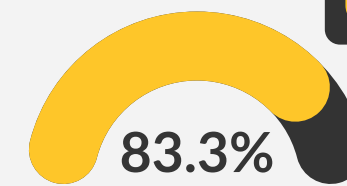

## Hypothesis

Users often struggle to make decisions due to an overwhelming number of options, leading to decision fatigue and difficulty aligning preferences with potential matches, resulting in communication gaps.

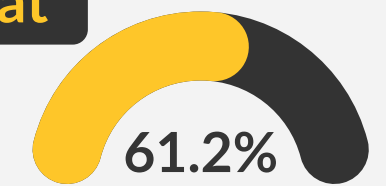

## Suvey Insights

[Survey Questions](#) [Survey response](#)

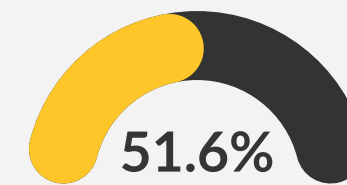

### Uncovering the "What"

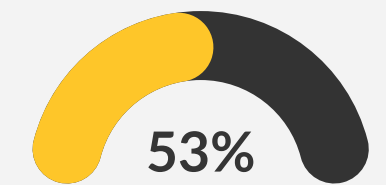

User feel planning date is most challenging in the early stages.

Users are uncertain about what the other person would enjoy.

Users have indecisive conversations about what to do

Users find personalised date suggestions to be helpful.

## Interview Insights

[1:1 Interviews](#)

### Uncovering the "Why"

**Challenges in Communication:** Many users found the initial communication phase challenging. They felt unsure about how to gauge their match's interests without seeming intrusive

**Lack of Shared Interest Information:** Users frequently struggled to identify mutually enjoyable activities due to insufficient information on profiles about hobbies and interests.

**Importance of Detailed Profiles:** There was a consensus among users that more detailed profiles would significantly improve the date planning process.

**Desire for Enhanced Features:** Users suggested that Bumble could benefit from implementing features which showed shared interest.

Users are not sharing much about their interests.

## User Persona

Name: Ritesh Kumar

Age: 26

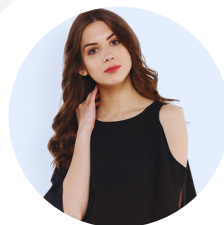

Occupation: Marketing Manager

City: Gurgaon

Prefers intimate settings like cozy cafes over crowded bars.

**Goal:** Plan dates that impress his matches by aligning with their preferences, showcasing thoughtfulness.

**Pain Point:** Feels weird asking directly about dating preferences, fearing he'll come across as insensitive.

Name: Anchal Sharma

Age: 25

Occupation: Analytics Manager

City: Delhi

Enjoys planning unique experiences, like trying new cuisines.

**Goal:** Enjoy thoughtful dates planned by someone who "gets" her, and have a good time.

**Pain Point:** Hesitates to reveal too much information publicly due to privacy concerns.

## Jobs-to-be-done Statement

When I want to plan a date with a Bumble match,  
But I don't know their preferences & feel awkward asking directly,  
Please help me understand their dating style subtly,  
So I can plan a date they'll love and make a great impression.

## Problem framing canvas

### What is the true problem?

People on Bumble struggle to plan dates because of communication gap.

**Why?** It's hard to suggest a date someone will really enjoy when you don't know much about their interests.

**Why?** Bumble profiles don't have enough information about what people like to do on dates.

**Why?** Many users are worried about their privacy and don't want to share too many personal details publicly.

### Who's Facing This Problem?

**25-34 year old professionals** in Tier-1 cities are especially affected.

### How do we know it is a real problem?

- **Quantitative:** Bumble's data shows that many matches in India don't lead to conversations, and lots of first dates are rated as disappointing.
- **Qualitative:** Users often complain in interviews that it's hard to plan dates because they don't know enough about their matches.

### What is the value generated by solving this problem?

#### For the target customers:

- Less stress and wasted time planning dates.
- More enjoyable first dates that could lead to real connections.

#### For the business:

- More people using the app and staying on it longer.
- More people willing to pay for in-app purchases.

The top solutions are “This or That: Date Edition”, “Date vibe ”, and “AI Date Concierge”

This or That: Date Edition

**How it Works:** Bumble presents users with "This or That" questions about date preferences. Examples include "Fancy dinner or street food market?" and "Comedy show or live music?"

**Gamification:** Users earn points for answering questions. Matches' answers are revealed after both respond, highlighting compatibility.

**Value:** This approach makes sharing preferences interactive and less intimidating, providing a fun way to gauge compatibility early on.

Date vibe

**How it Works:** Bumble introduces a series of visual "Date Vibe" badges that users can display on their profiles. The users can customise with whom they want to share i.e. with everyone, with the matches.

**Badge Examples:** "Champagne Night," "Coffee & Croissant," "Movie day out," etc

**Value:** These badges provide the user with at-a-glance insights into a match's overall dating style and preferences, allowing them to tailor their approach without explicit questioning. Moreover, the customisation feature takes care of their privacy also.

AI Date Concierge

**How it Works:** Bumble offers a premium, AI-powered "Date Night Concierge" that generates personalised date suggestions based on user preferences and restrictions. Users can indicate activity types, budgets, location preferences, dietary restrictions, etc. Bumble could partner with local businesses or event platforms to integrate reservations and bookings directly within the feature.

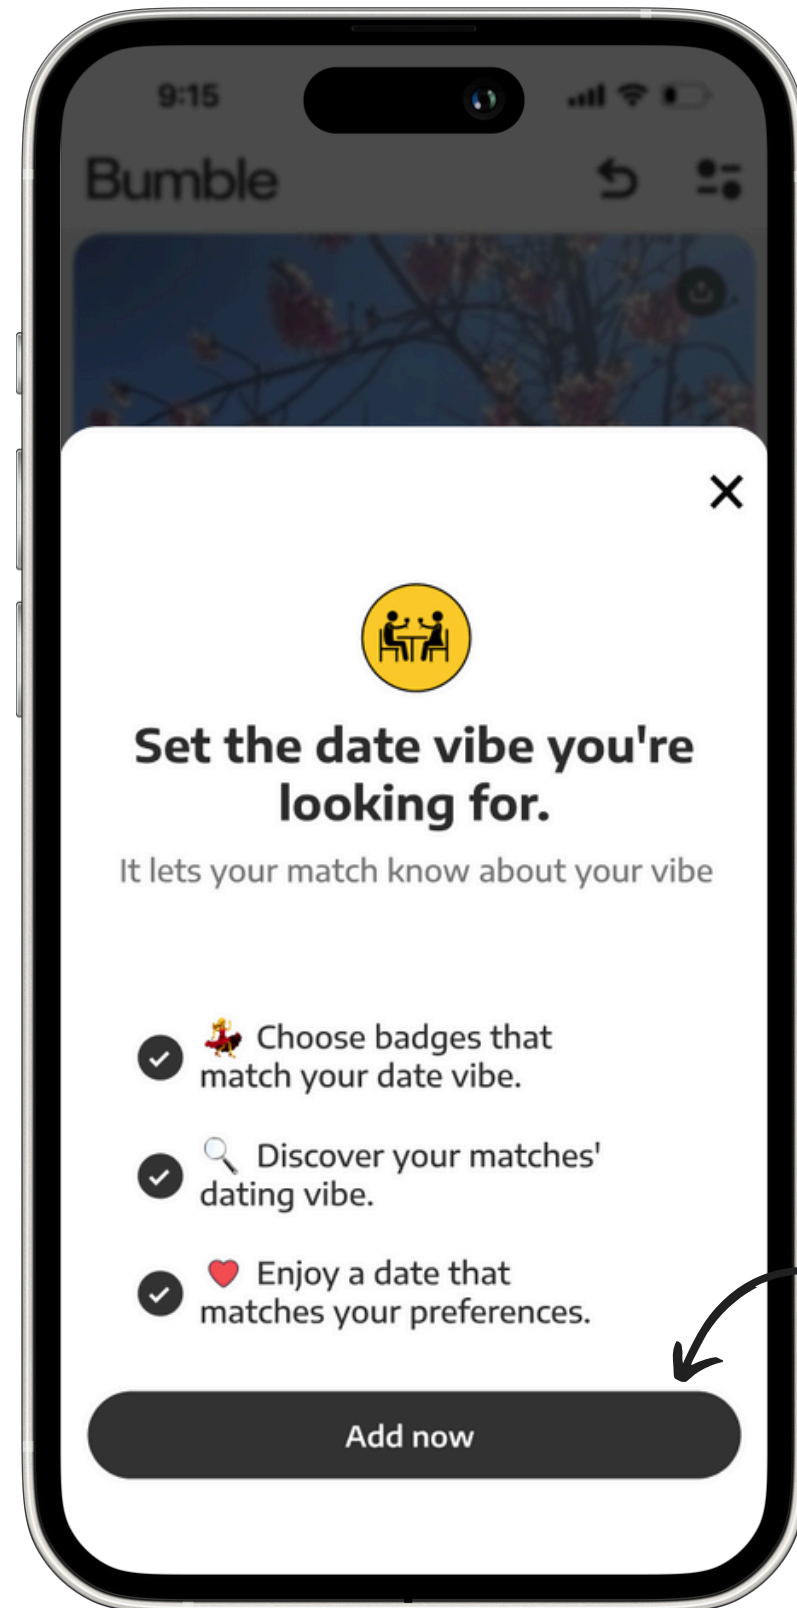

**Value:** Provides a personalised, stress-free way to plan unique dates, respecting user privacy and addressing decision fatigue.

Why is the “Date vibe” prioritised?

Users can add up to five date vibes.

Clicking this button will take you to the date vibe screen where you can add your vibe.

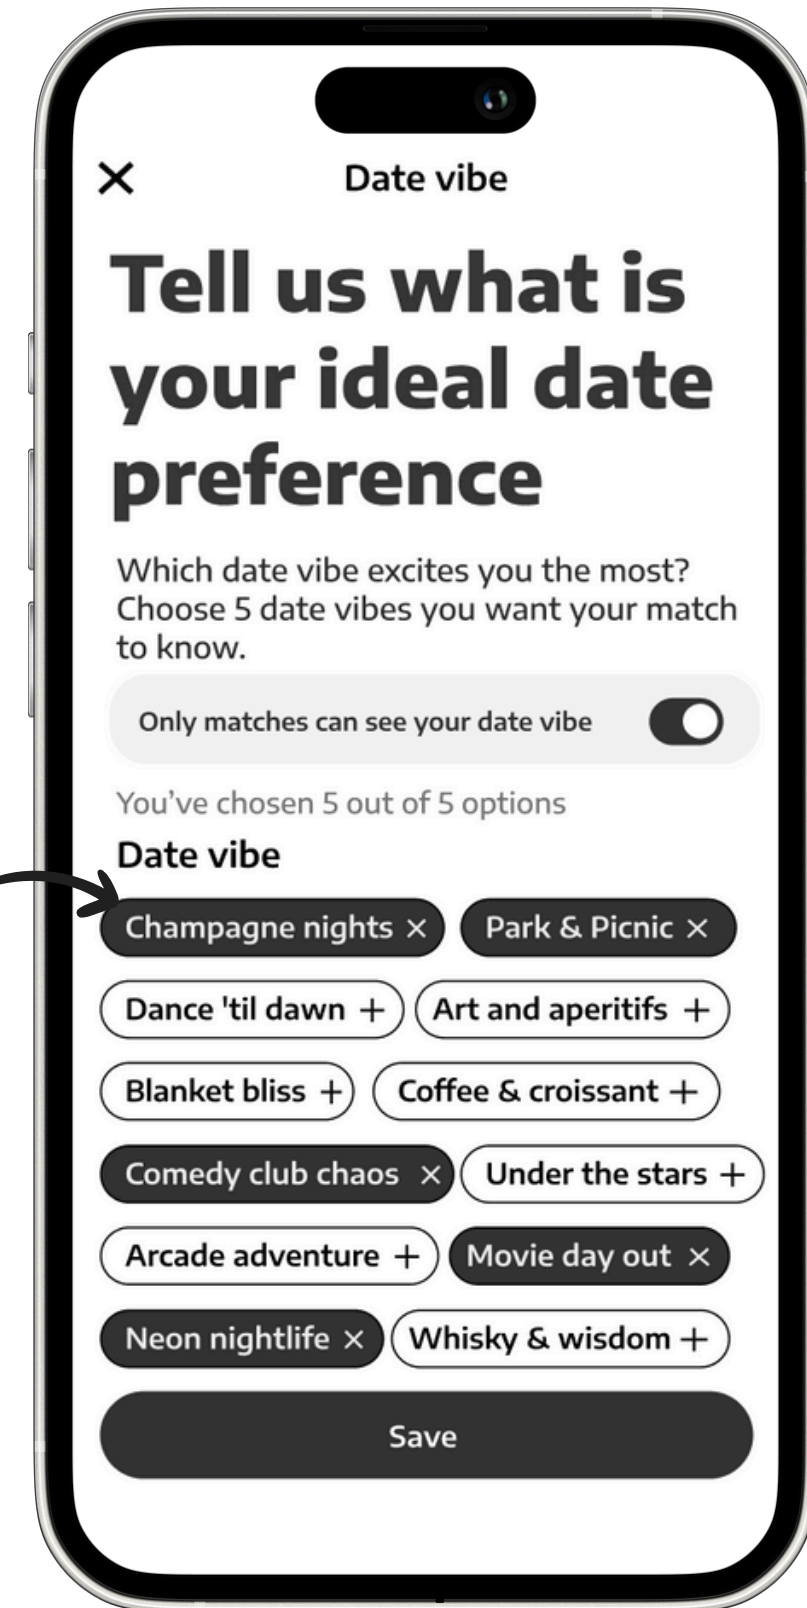

Users receives a notification or prompt to add their date vibe

Clicking this button will allow you to set the visibility preference for your date vibe.

Users can tap to select their desired date vibe.

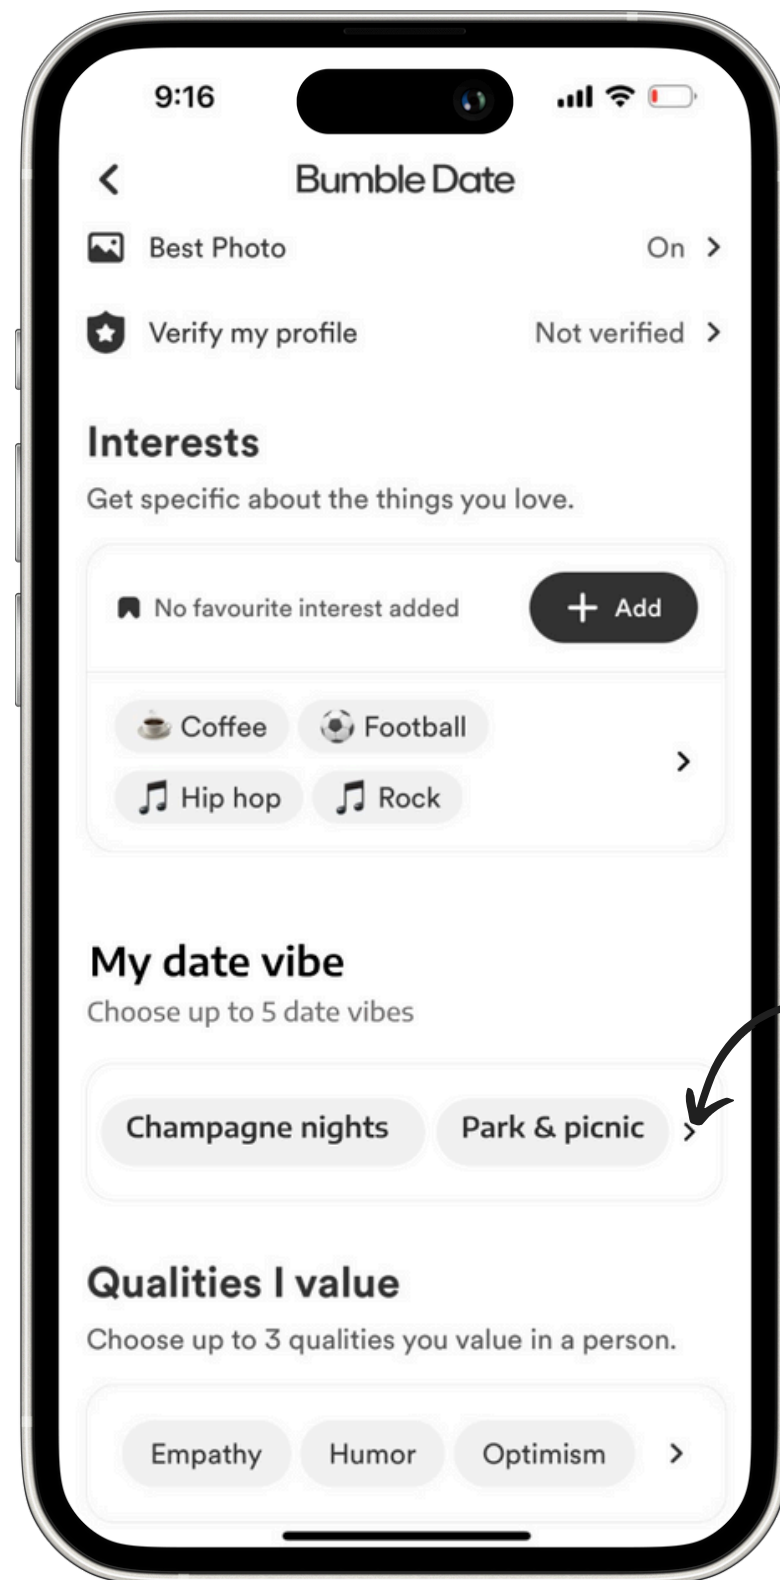

Users reach the date vibe screen where they can select their date vibe.

The user chooses their desired date vibe and sets its visibility preferences.

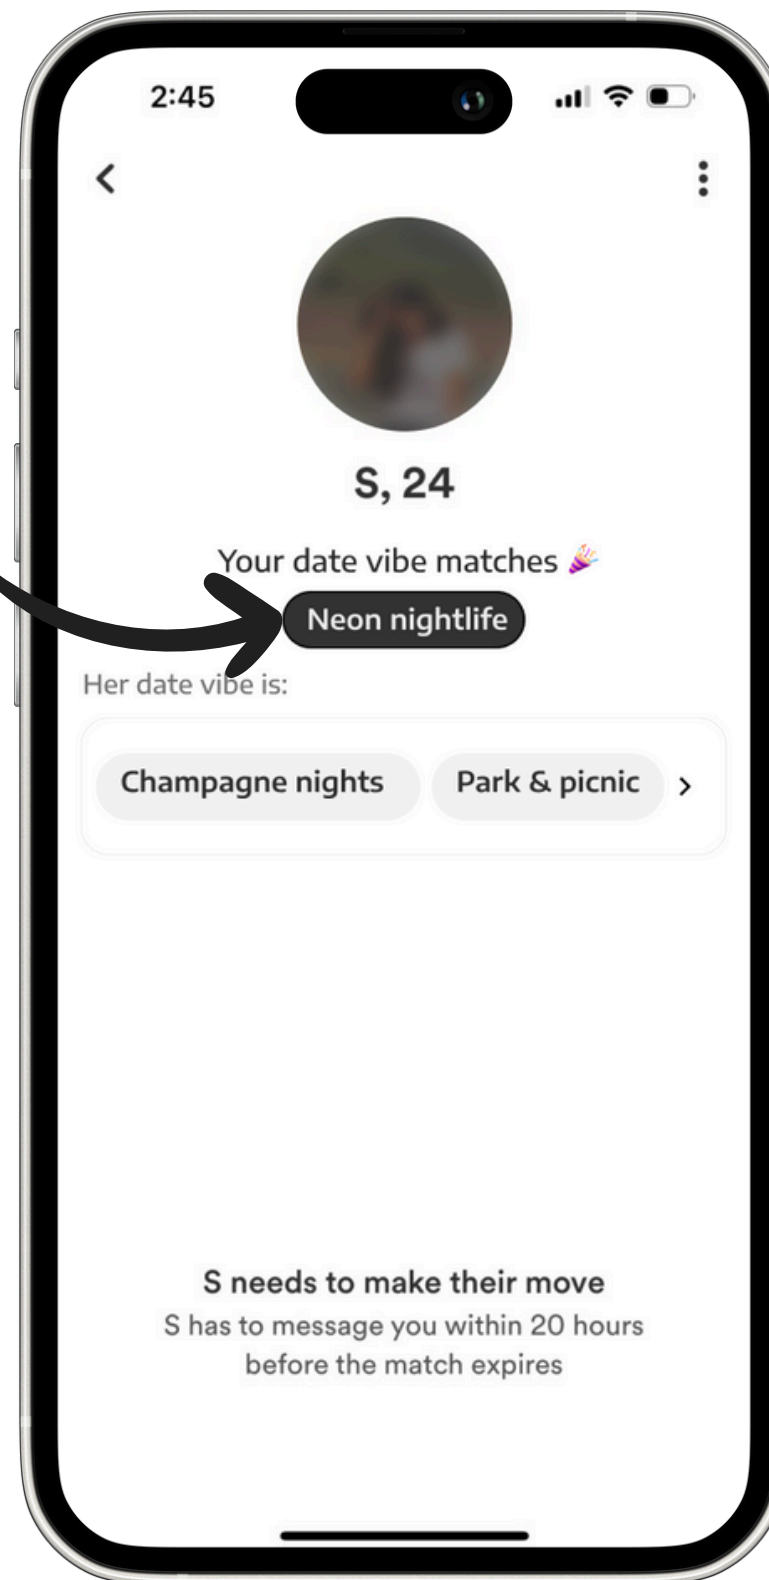

# Wireframing

Users can view or edit their date vibes on the Edit Profile screen.

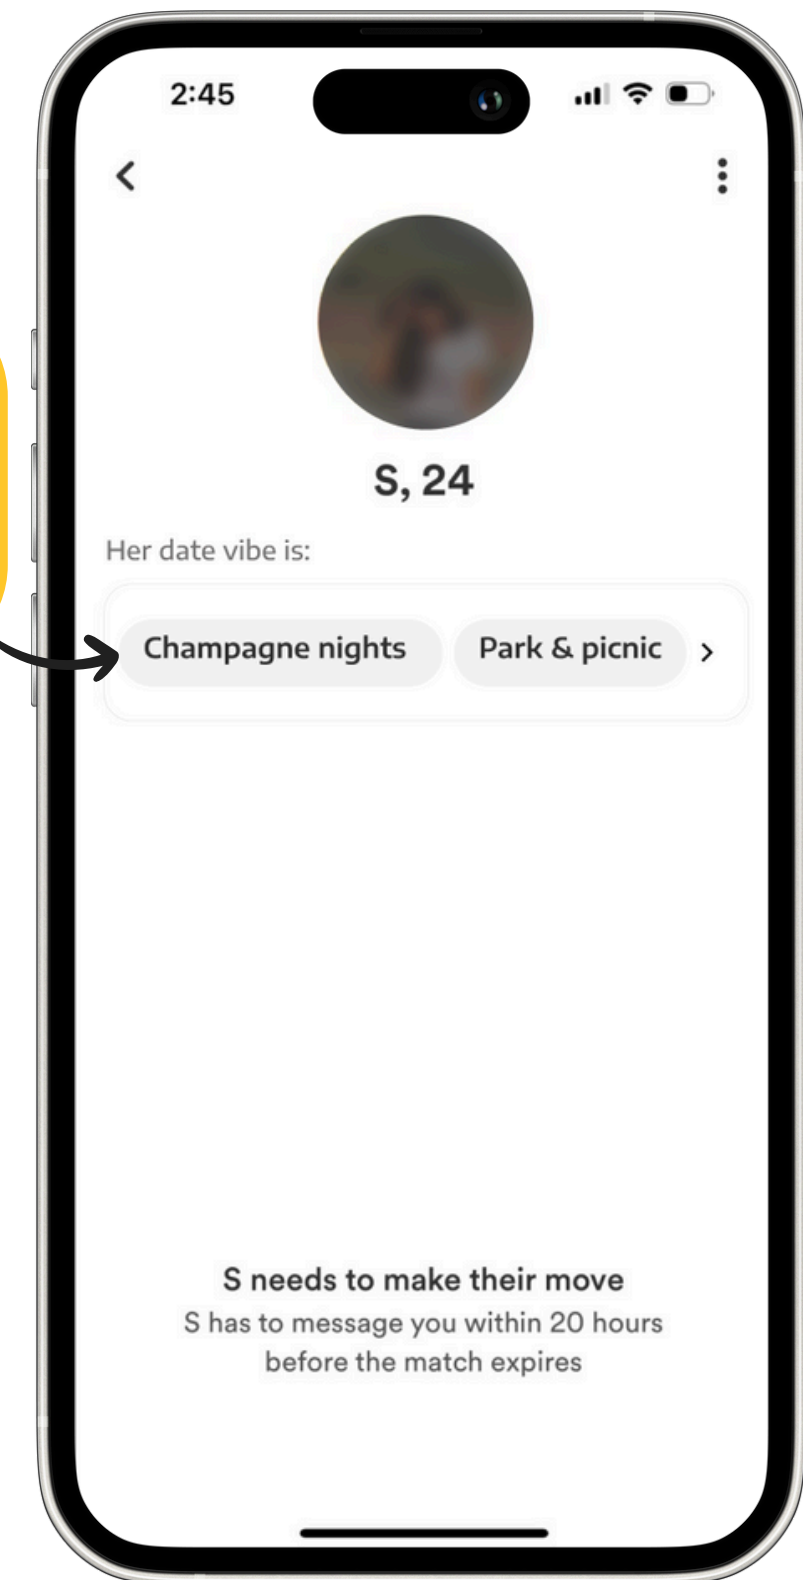

Users can see which one of their date vibes matches.

Click this button to edit your date vibe preferences.

Upon matching, users can view their shared date vibe preferences.

Click this button to view your match's preferences.

If users' date vibes don't match, they can still view their match's date vibe.

**North Star Metric: Increase in matches leading to conversations about shared date preferences.**

**Guardrail Metric: No significant increase in unmatched rate after Date Vibe implementation.**

## Type

## Metric

## Goal

### Awareness

- # Users viewing profiles with "Date Vibe" per day.
- % of users who have edited their "Date Vibe" settings.

- Measures the reach and visibility of the feature.
- Indicate user awareness and interaction.

### Activation

- % of users who add at least one "Date vibe" to their profile.
- CTR on notifications of setting up "Date Vibe" badges.

- Track initial engagement.
- Measure effectiveness of prompts.

### Adoption

- # of users with visible "Date Vibe" badges / Total active users
- Distribution of users across visibility with matches or everyone.

- Indicates the overall feature adoption rate.
- Provides insights into user comfort levels with sharing preferences.

### Engagement

- # of times "Date Vibe" badges are mentioned in post-match conversations per day/week
- Average # of messages exchanged on matches where "date vibe" badges were mentioned vs. not mentioned

- Measures how actively users are incorporating badges into their communication and date planning.
- Assesses if badge mentions correlate with more engaged conversations.

### Retention

- Retention rate of users who have added "Date Vibe" badges compared to those who haven't
- % of users who edit their badge selections over time

- Determines if the feature boosts retention.
- Indicates if users find value in updating their badges as their preferences evolve.

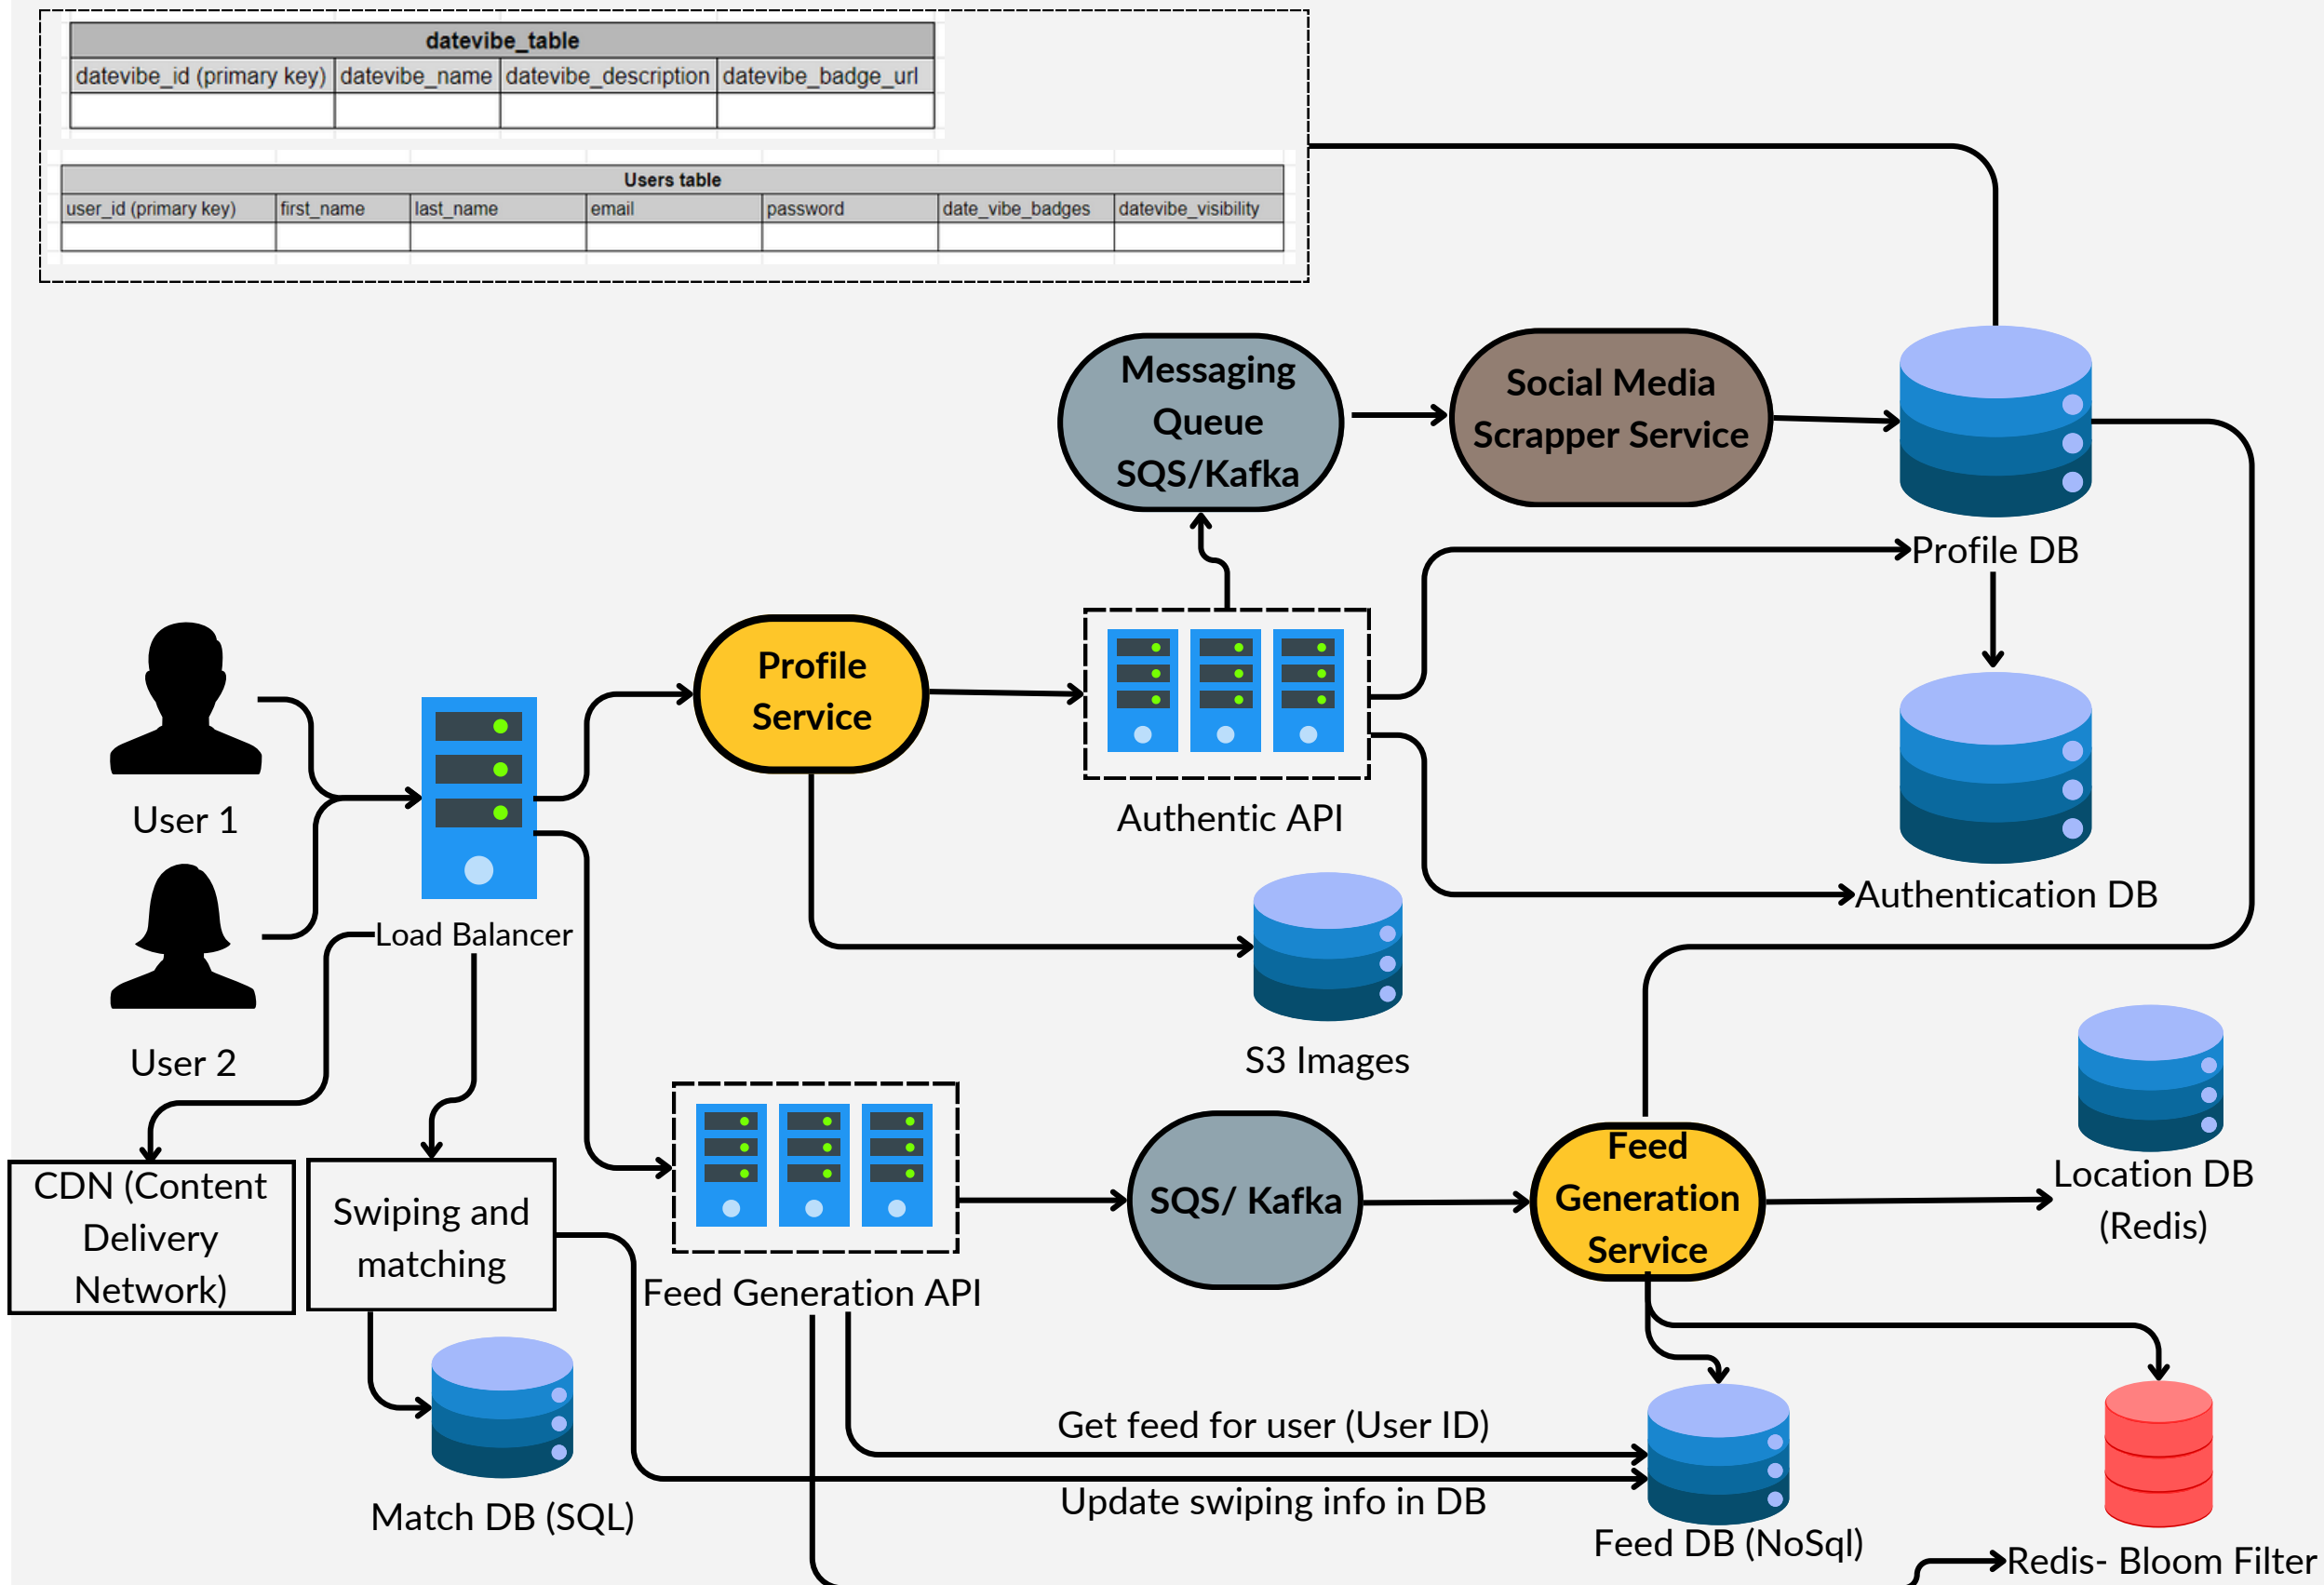

### Satisfaction

- User survey scores specifically asking about the "Date Vibe" badge experience

- Gathers direct feedback on user satisfaction with the feature.

## ★ The solution can still have a concern for privacy and lack of engagement

### System design

### Pitfalls

**1. Privacy Concerns (Despite Controls):**  
**Problem:** Even with visibility controls, some users might still feel uneasy about sharing any date-related preferences, fearing judgment or stigma.

#### Mitigation:

**Highlight Privacy Features:** Emphasize the control users have over who sees their “Date vibe” and how their data is used.

**2. Lack of Engagement or Follow-Through:**  
**Problem:** Users might add badges but not actively use them to guide their interactions or date suggestions, rendering the feature ineffective.

#### Mitigation:

**Integrate “Date vibe” into Matching:**  
Develop algorithms that prioritize matches with shared badges or highlight badge compatibility.

**Prompt Date vibe-Related Conversations:**  
Suggest icebreakers or conversation starters based on shared or intriguing badge choices.
